Drain Opening	45mm
Additional Features	Matching pop-up waste included Easy to clean design and finish
Warranty:	Structure: 2 Years <i>Please refer to Warranty Guide for full Terms & Conditions</i>

Care Instructions:

Despite being a durable material, concrete has naturally occurring pores and streaks that add to the beautiful patina of the product over time. To best maintain your concrete basin please follow the below instructions.

- Avoid using abrasive cleaners: instead use a pH neutral cleaner
- Avoid leaving hot water in basin for prolonged periods of time
- Wipe basin dry when not in use where possible: although not always practical, keeping your basin dry when not in use can prevent the build-up of hard water deposits
- As with any other ceramic basin: improper use or impact with hard objects may cause chipping or scratching
- Please refrain from using scour pads on the concrete as it can scratch your basin and breakdown the sealant.

Important Information:

Designed in Australia, our concrete basins are a handmade product aimed at maintaining the natural feel and finish of concrete while infusing it with beautiful colours. Being a natural material and staying true to its organic form, there can be slight colour movement/variation through the product and the potential for small air pockets to appear on the exterior. Please note, we cannot guarantee that the product will or will not have slight colour variation or air pockets, as each basin is different and unique. These characteristics have no bearing on the structural integrity of the concrete basin. Our concrete basins are finished with a transparent waterproof sealant so there is no need to reseal before installation.
