

CASA Back to Wall Close Couple Toilet

CCT

The CASA Close Couple Toilet is an architect's staple for its versatility and reliability. The CASA Toilet is easier to clean, featuring a rimless inner pan unlike traditional toilets which harbour bacteria and grime. Where traditional toilets distribute water from beneath the rim, the CASA Toilet flushes water around the entire pan with an advanced direct flushing system that is more water efficient and effective. Available in a classic round shape or a more modern squared design.

Casa Back to Wall Close Couple Toilet
